

I.O.U. #7

The reason you're receiving the next I.O.U. so quickly is the last issue, regarding the Harvard Business Review and GDI's incredible new presentation go so well together you really should take full advantage of the timing.

It's rare to find a company these days that's willing to step up to the plate and provide a viable and practical option for giving people a truly powerful option to build financial independence during tumultuous times.

The impact of becoming self-reliant without the help of large corporations and governments shows tremendous positive spirit of which we can all take great personal pride.

So how would you like to have this presentation working for you?

You can, it's complimentary for GDI affiliates and I'll show you how to set it up (It's easy)

In case you didn't know this, your GDI affiliation gives you three replicated sites. These are the three "free" sites that are pre-programmed with your user name that you can use to recruit new members to your team.

I'll show you how mine are set up.

www.my.ws/owenslv

(Works great with the [Ferrari flyer](#))

www.freedom.ws/owenslv

(This is the Income For Life site with the income calculator)

www.website.ws/owenslv

(This could well become the best way to introduce GDI to new prospects)

Most recent members already have this new presentation as a default at their www.website.ws/username. Some of us "pioneers" have other older presentations that show up if you go to these various sites, so you may have to do a few clicks to make things work the way you want them.

So here is the trick!

This various presentations, including the new "Recession Buster" are sitting on your GDI virtual "business site" just waiting to be activated. All you have to do is go to your virtual "business site" www.website.ws > sign in > My Replicated Sites and allocate whatever presentation you want to play at whatever site you want - Now isn't that cool?

Following is a more detailed explanation for you.

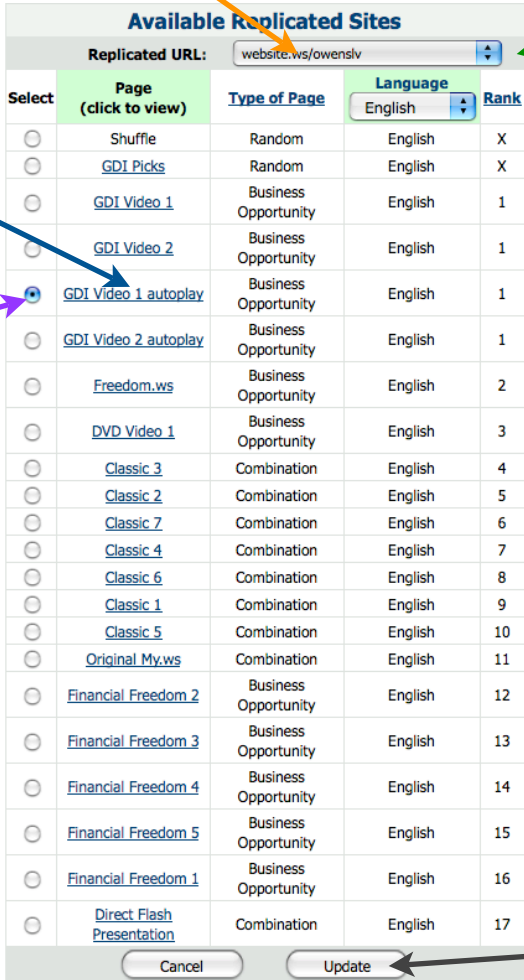

Are you helping enough people get what they want so you can get what you want?
